Subject: Information on roofing repairs

Roofing repairs are to start on February 27, 2006. Approximate time will be at 9:00 am to 5:00pm. Repairs will affect buildings 3065/3067. The work that is to be started first is the supply of materials to roof. Further work will continue as weather permits. Be assured that they will not tear off the old roof unless they are confident that they can put a new one on before it rains again. Please expect some noise and inconvenience.

I have been instructed to have residents in these buildings and residents located in adjacent buildings to remove their cars from these areas for the roofing trucks that will need accessibility. You can park your cars in any of the parking spaces on the property that are not designated for visitors or handicap parking.

You are also asked to remove any articles you have in your breezeways that you do not want affected by particles or dust caused do to the replacement of the roofs.

If you have any further questions please call the office.

Thank you for your cooperation and understanding.

Sincerely,

Theresa Williams
Community Director
