Subject: Pool Closed for Repairs

I regret to inform you that the pool will have to be closed due to deterioration of plaster on the bottom of the pool.

Because of the amount of plaster that is breaking apart there is a potential safety and liability issue if someone was to accidently step on the deteriorating material.

Depending on what process will be decided for correction the pool will be closed up to 4 weeks.

If you have any further questions please call the office.

Thank you for your cooperation and understanding.

Sincerely,

Theresa Williams
Community Manager
