## **WATER CONSERVATION REMINDER**

On Thursday, July 31, 2014 during an executive meeting of the Board of Directors and Eastern Gardens (EG) management, in support of EG's water conservation program as mandated by the Sacramento Suburban Water District, the board discussed other options that we might be able to do within our community. After careful review and consideration for the membership, your board of directors and management took another step to help our drought situation. Therefore, all members who have their own water hoses that are attached to the building hose bibs are mandated to have a shut-off nozzle placed on the end of their hoses. You are provided one (1) week from the date of this notice to comply, otherwise the hose will be removed.

As stated, this action is necessary and in support of EG's water conservation program. Also, please ensure that water is tightly shut-off, do not leave the water on and that also you are not watering areas that is already being watered by the sprinkler system, for example, lawn areas, shrubbery and trees. Please only water your own individual potted plants that you are allowed to have within your breezeway and please continue to comply with the "No Car Washing" restriction.

The board and management apologize for any inconvenience but California's drought situation is very serious, water prices are constantly increasing and we must all do our part in water conservation. Everyone's understanding and cooperation is appreciated and helps assure the success and conservation of our water.

Sincerely,  
Eastern Gardens Board of Directors
